

# Case Study

**Project:** Residential Furniture  
**Project Date:** Summer 2019  
**Project Value:** £400k  
**Project Duration:** 12 Weeks

**Project Management Service including:**

- Space planning and design
- Standard and bespoke furniture
- Delivery & installation schedule
- Out of hours installations (evening/weekend)

## Stylish refurbishment of student open-plan living spaces.

Working in partnership with an industry leading property developer, we were thrilled to be involved in the refurbishment of brand-new student accommodation at Dagfa House Halls in Nottingham.

Set in the beautiful surroundings of Beeston, and within a 5-minute walk of The University of Nottingham Campus, this exciting development involved the interior refurbishment of modern furniture solutions into spacious shared properties including self-contained studios, townhouses and cluster apartments.

Our brief was to design, manufacture, and install bespoke furniture and accessories to compliment the trendy interior, with a luxury mix of traditional and modern aesthetics.

To help visualise how the new areas would look, we provided a fully assembled prototype room setting and developed final layout designs. The interior furniture scheme incorporated contemporary white wood finishes, with a mix of grey and yellow furnishings that would appeal to students and visitors.

Furnished with quality furniture, fittings, and finishes we created collections in shared lounge and dining

areas, and 237 bedrooms that included:

- beds, headboards, bedside tables, storage & wardrobes;
- study desk, shelving, and seating;
- lounge sofas and storage;
- dining table and seating.

As part of our complete project management service, we also sourced and supplied modern home accessories including fridges, kettles, irons, ironing boards, hoovers, dustpans and mops.
